CANADA CARBON INC.
NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS
(EXPRESSED IN CANADIAN DOLLARS)
FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2021 AND 2020

1. NATURE AND CONTINUANCE OF OPERATIONS

Canada Carbon Inc. (hereafter the "Company") was incorporated in British Columbia on August 13, 1985 and is listed on the TSX Venture Exchange ("TSX-V").

The Company's principal business is the acquisition, exploration and evaluation of mineral properties. In fiscal 2012 the Company positioned itself as a carbon science company focused on graphite. The Company is in the exploration and evaluation stage on its projects and as such, to date, has not generated significant revenues from its operations.

The Company's head office is located at 5213 Durie Road, Mississauga, Ontario, L5M 2C6.

The financial statements were approved by the Board of Directors on November 15, 2021.

The Company is in the process of exploring its exploration and evaluation assets. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves, the achievement of profitable production, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts and political uncertainty.

The Company's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of respiratory illness caused by COVID-19. The Company cannot accurately predict the impact COVID-19 will have on its operations and the ability of others to meet their obligations with the Company, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect the Company's operations and ability to finance its operations.

These condensed interim financial statements have been prepared with the assumption that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. As at September 30, 2021, the Company had a working capital of \$23,276 and an accumulated deficit of \$28,103,814 compared to a working capital deficit of \$161,772 and an accumulated deficit of \$27,761,170 as at December 31, 2020. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Management believes it will be successful in raising the necessary funding to continue operations in the normal course of operations. These financial statements do not include the adjustments that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material. (Note 18)

CANADA CARBON INC.
NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS
(EXPRESSED IN CANADIAN DOLLARS)
FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2021 AND 2020

2. STATEMENT OF COMPLIANCE

These condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations. Accordingly, these condensed interim financial statements do not include all of the information and footnotes required by International Financial Reporting Standards ("IFRS") for complete financial statements for year-end reporting purposes.

3. BASIS OF PRESENTATION

These condensed interim financial statements have been prepared on a historical cost basis except for financial instruments recorded at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

In the preparation of these condensed interim financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the year. Actual results could differ from these estimates.

4. SIGNIFICANT ACCOUNTING POLICIES

These condensed interim financial statements should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2020 and were prepared using the same accounting policies, method of computation and presentation as were applied in the annual financial statements for the year ended December 31, 2020.

5. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of its properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. Management considers the Company's capital structure to primarily consist of the components of shareholders' equity.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the nine months ended September 30, 2021. The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange ("TSXV") which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months.

As at September 30, 2021, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

6. FINANCIAL RISK FACTORS

There have been no significant changes in the risks, objectives, policies and procedures during the nine months ended September 30, 2021. The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to cash and cash equivalents and receivables. The receivables primarily relate to sales tax due from the Federal and Provincial Governments. The Company has no significant concentration of credit risk arising from operations. Cash is held at a Canadian financial institution from which management believes the risk of loss to be low. Management believes that the credit risk concentration with respect to its receivables is remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. Additional funding will be required to get the Miller project through the feasibility stage; however, management believes it will be able to obtain the necessary funding.

Market risk

(a) Interest rate risk

The Company has cash balances and no interest-bearing debt, therefore, interest rate risk is minimal.

(b) Foreign currency risk

The majority of the Company's administrative expenditures are transacted in Canadian dollars. The Company funds certain expenses in the United States on a cash call basis using US dollar currency converted from its Canadian dollar bank accounts held in Canada. Management does not hedge its foreign exchange risk. The Company holds negligible cash balances in US dollars.

(c) Price risk

The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

(d) Title risk

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company does not expect material movements in the underlying market risk variables over the next three month period.

7. CASH AND CASH EQUIVALENTS

During the nine months ended September 30, 2021, the Company's short term money market instruments did not accrue interest (2020: 0.25% - 1.25% per annum) and were redeemable at any time without penalty.

16. SEGMENTED INFORMATION

The Company primarily operates in one reportable operating segment, being the acquisition and exploration of mineral properties in Canada. As the operations comprise a single reporting segment, amounts disclosed in the financial statements also represent segment amounts.

17. COMMITMENTS AND CONTINGENCIES

The Company is obliged to spend \$500,000 by December 31, 2022 as part of the flow-through funding agreement for shares issued in July 2021. The flow-through agreements require the Company to renounce certain tax deductions for Canadian exploration expenditures incurred on the Company's mineral properties to flow-through participants. The Company indemnified the subscribers for any related tax amounts that become payable by the subscribers as a result of the Company not meeting its expenditure commitments.

The Company's exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations. See Note 12.

18. SUBSEQUENT EVENTS
